The New School generally favored it, but the Old did not. A new plan has, within a few months been prepared by the Committee for presentation at the present Assemblies in Harrisburg and Albany, N. as follows:

The motives that impel to a re-anion are higher and nobler than those which pertain to the denominational advantage of either Assembly. They spring from a desire to benefit the whole Church and the cause of religion. Churches growing up in all the new Territories and States are ceeking admission into one or the other of the Assemblies. The great influx of population into these southins of the country is becoming a great element of concern in the religious world. There is an earnest desire among inselligent men for a more thereough and barmoslous union between all Christian denominations. The Committee feel that this desire should be promoted, and that a divergence among these different classes of Christians would be attached with dis-
